

Crimson Notepad

A lightweight Markdown notebook built for instant access.

Write less. Switch less. Focus more.

Why Crimson Exists

While studying, researching, or coding, important roadmaps and notes often end up buried inside:

- ChatGPT conversations
- Browser tabs
- PDFs
- Large note-taking applications

Every time you need to reference them, you break your flow.

Crimson Notepad was created to solve one simple problem:

Your notes should always be one shortcut away.

Press a shortcut.

Read your note.

Continue your work.

No tab switching.

No workspace loading.

No distractions.

Philosophy

Crimson is **not** trying to replace Obsidian.

Crimson is **not** trying to become a second brain.

Crimson is designed around one idea:

Features

Core

- Markdown (.md) support
- Local-first storage
- Lightweight and fast
- Dark Crimson theme
- Auto-save
- Simple note management

Productivity

- Global shortcut
- System tray support
- Instant note access
- Search notes
- Recent notes

Study Features

- Mermaid diagrams
- Checklists
- Code blocks
- Tables
- Reading mode

Future

- Overlay mode
 - Quick note launcher
 - Note templates
 - Auto updates
-

Example Workflow

Traditional Workflow

```
Study
↓
Need roadmap
